

PRESS RELEASE

Shafer Enterprises LLC
Stockbridge, Georgia USA

FOR IMMEDIATE RELEASE

Shafer Enterprises LLC of Stockbridge, GA, manufacturer of **COOL SHIRT®** Personal Cooling Systems for racecar drivers and **HANS Performance Products of Atlanta GA** announces the addition of the **COOL SHIRT® for HANS Users** to the "**HANS Friendly Program**". This new driver cooling shirt has been specially designed with no cool water tubing over the shoulders for HANS users. Drivers who wear a **HANS Device** experience no "pinching off" of the water tubing and no personal discomfort from pressure placed on the tubing by the restraint device. Both **COOL SHIRT® Personal Cooling Systems** and **HANS Performance Products** are dedicated to making racing safer for the drivers and this cooperation between the two companies continues to demonstrate that commitment to safety.

COOL SHIRT® Personal Cooling Systems help keep drivers cool and mentally alert especially through their final laps, when heat fatigue usually occurs. For more details call (800)345-3176 or visit them on the web at www.coolshirt.net
